Recognized by World Memory Championships

XRPS → IQFI → DF717 Quant Engine → XRP Rewards

Executive Summary

IQFI is a next-generation digital asset ecosystem built around XRP.

The ecosystem is powered by a unique structure:

XRPS → IQFI → DF717 Quant Engine → XRP Rewards

Unlike traditional staking platforms that rely primarily on token emissions, IQFI aims to generate value through quantitative investment strategies operated by DF717.

Users enter the ecosystem through XRPS (XRP SUPERCYCLE), swap into IQFI, stake IQFI, and become eligible to participate in the XRP Reward Program.

The IQFI Foundation accumulates XRPS through the swap mechanism and may utilize treasury assets to generate investment returns through DF717's quantitative trading infrastructure.

A portion of generated profits may be allocated toward XRP acquisition and reward distribution.

1. Vision

Building the Future of XRP Finance

Most digital asset projects distribute rewards through inflationary token issuance.

IQFI seeks to establish a different model:

The objective is to create a sustainable XRP-centered financial ecosystem supported by real economic activity and quantitative investment performance.

2. Ecosystem Overview

The IQFI ecosystem consists of three core components.

XRPS	IQFI	DF717 Quant Engine
<p>XRPS SUPERCYCLE</p> <p>XRPS is a Solana-based community token designed as the primary gateway into the IQFI ecosystem.</p> <p>Key Utilities</p> <ul style="list-style-type: none"> Ecosystem entry asset Community participation XRPS SUPERCYCLE branding IQFI swap asset 	<p>XRPL UTILITY TOKEN</p> <p>IQFI is the core utility token of the ecosystem, issued on the XRP Ledger.</p> <p>Key Utilities</p> <ul style="list-style-type: none"> Staking participation Access to reward programs Ecosystem participation Future platform services 	<p>DF717 serves as the investment and revenue-generation engine of the ecosystem.</p> <p>Key Functions</p> <ul style="list-style-type: none"> Quantitative investment research Algorithmic trading Portfolio optimization Risk management Revenue generation

3. User Journey

Step 1	Purchase XRPS through Pump.fun.
Step 2	Swap XRPS for IQFI through the IQFI platform. After the swap: User → Holds IQFI; Foundation → Holds XRPS
Step 3	Stake IQFI.
Step 4	Become eligible for the XRP Reward Program.

4. Foundation Treasury

Treasury Structure

As users swap XRPS for IQFI, XRPS accumulates within the Foundation Treasury.

The Treasury serves as the economic backbone of the ecosystem and may be utilized to support ecosystem operations, investment activities, and long-term sustainability.

As ecosystem participation increases, Treasury assets may grow accordingly.

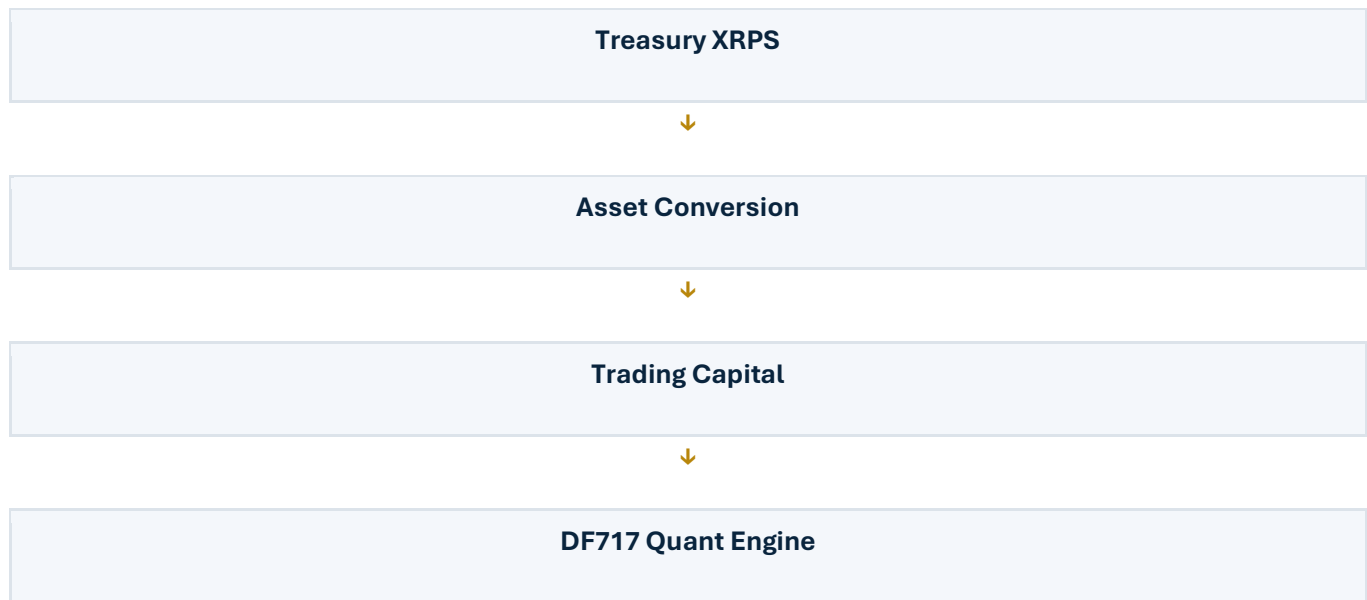

5. DF717 Quant Investment Model

Treasury Deployment

Treasury-held XRPS may be converted into liquid assets such as:

- USDT
- USDC
- SOL
- Other approved treasury assets

These assets may then be deployed through DF717 quantitative investment strategies.

Quantitative Strategies

DF717 researches and operates various quantitative investment approaches, including:

- Algorithmic trading
- Market-neutral strategies
- Statistical arbitrage
- Quantitative momentum systems
- Multi-asset allocation models
- Advanced risk management systems

The primary objective is long-term capital growth through disciplined quantitative investing.

6. Revenue Model

Investment Profit Generation

DF717 seeks to generate investment returns using treasury capital.

Revenue Allocation

A portion of investment profits may be allocated toward:

XRP acquisition
 XRP reward distribution
 Treasury strengthening
 Platform development
 Research and infrastructure expansion

Allocation policies may evolve over time according to ecosystem needs.

7. XRP Reward Program

XRP-Based Rewards

The IQFI ecosystem is designed to provide XRP-based rewards to eligible participants.

Rewards are distributed in XRP rather than newly issued ecosystem tokens.

Reward Eligibility

Reward allocation may consider:

Amount of IQFI staked
 Staking duration
 Treasury conditions
 Investment performance
 Platform policies

Reward Target

The platform may target XRP rewards of up to 22% APY.

Actual rewards are not guaranteed and may vary based on:

Investment performance
 Market conditions
 Treasury status

Risk management requirements

Platform policies

The XRP Reward Program is designed to align ecosystem growth with sustainable long-term participation.

8. Ecosystem Flow

9. Token Utility

11. About DF717

DF717 is a quantitative investment solutions company.

The company researches data-driven investment strategies, algorithmic systems, and portfolio management models with the objective of generating sustainable long-term returns.

IQFI leverages DF717's investment research and quantitative infrastructure to support ecosystem development and reward generation.

12. Risk Disclosure

This document is provided for informational purposes only.

This document does not constitute investment advice.

Digital assets are highly volatile.

Participants may lose part or all of their capital.

Past performance does not guarantee future results.

Rewards are not guaranteed.

Up to 22% APY represents a target reward level and not a guaranteed return.

Platform policies may change.

Regulatory developments may require modifications to the ecosystem structure.

XRPS is not affiliated with Ripple.

IQFI is not affiliated with Ripple or the XRP Ledger Foundation.
